929-235-2332 | KaziAnwar0112@gmail.com | github.com/kazi011225

EDUCATION

Queens College

BS in Computer Science

Flushing, NY

Expected Graduation Dec. 2026

LaGuardia Community College

Associate's in Computer Science

New York, NY

Aug. 2022 – Dec. 2024

EXPERIENCE

Student Tech Mentor

Sept. 2024 – Dec. 2024

LaGuardia Community College

LIC, NY

- Guided students in building and customizing personal E-portfolio websites to showcase academic and professional goals
- Assisted students in setting up and configuring virtual machines using Ubuntu Linux for hands-on learning
- Provided support on basic Linux terminal commands and workflows to help students complete simple assignments
- Helped students debug and solve basic programming problems to improve their understanding of core coding concepts and techniques

Public Policy Advocate

Oct. 2022 – March. 2023

CARE

Washington D.C.

- Participated in CARE's national advocacy campaign to promote the State and Foreign Operations Appropriations Bill(SFOPS), supporting global humanitarian aid, health, and gender equity
- Met with U.S. Senators and Members of the House of Representatives for increased funding for international development program
- Delivered personal testimonies to congressional officers to emphasize the importance of foreign aid in reducing poverty and empowering women and girls globally
- Gained hands-on experience in legislative advocacy and civic engagement within a high-impact policy environment

Assistant GM/Finance Manager

Oct. 2014 – Oct. 2023

Great Neck Car Buyers and Sellers

Great Neck, NY

- Contributed to the development and growth of a small dealership; assisted in designing and refining the business model and operational structure with the General Manager
- Trained and mentored sales team members in sales techniques, advertising strategies, follow-up communications, and basic finance concepts to drive performance and customer satisfaction
- Managed and created content for all dealership social media accounts, increasing brand visibility and customer engagement
- Played a key role in driving overall sales performance, enhancing the dealership's market presence and financial results

PROJECTS

Air Force Lab Chatbot | Air Force Research Laboratory

June 2025 – August 2025

- Designed and developed a secure chatbot to assist new hires at the Air Force Research Laboratory
- Ran a locally hosted LLM (Meta LLaMa via Ollama) to power a conversational AI without external APIs or cloud services
- Engineered a floating widget front-end with a Python/Flask back-end to handle user requests and deliver real-time responses
- Applied local RAG to retrieve content from a text file and generate accurate, context-aware responses
- Embedded in Google Site with custom scripts to work within platform constraints for a smooth user experience
- Focused on data privacy, offline performance, and maintainability for use in secure environments

Car Parts Detection System | Personal Deep Learning Project

July 2025 – Present

- Built a YOLOv8-powered object detection system to identify distinct car parts
- Trained the model locally using PyTorch and Ultralytics YOLOv8 on a Mac M1 chip
- Wrote custom Python scripts to preprocess data, configure training, and fine-tune detection accuracy
- Prepared model weights (`yolo_v8n.pt`) for real-time inference in future mobile or embedded deployment scenarios

TECHNICAL SKILLS

Languages: Proficient in C++, Java, and Python

Operating Systems: Linux (Ubuntu), Windows, Mac (Unix)

Soft Skills: Detail-Oriented, Analytical Thinking, Strong Verbal & Written Communication, Eagerness to Learn New Skills
